

Enabling Holacracy within decentralised communities in the new economy

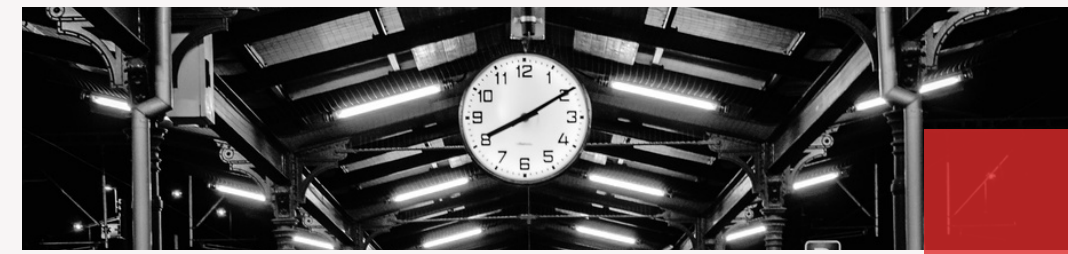

Intro

Disclaimer : it's early days yet

Nothing contained in this session constitutes a promise of tokens in exchange for investment or effort, thus nothing of what is described is any promise of securities offered.

Situation

- There is an ongoing socio-economic shift
- Knowledge workers prefer to work for purpose with other subject-matter experts
- The services that such knowledge communities can offer, are of great value to the market
- Decentralized Automated Organizations (DAO) provides the means to operate the communities

Knowledge Workers

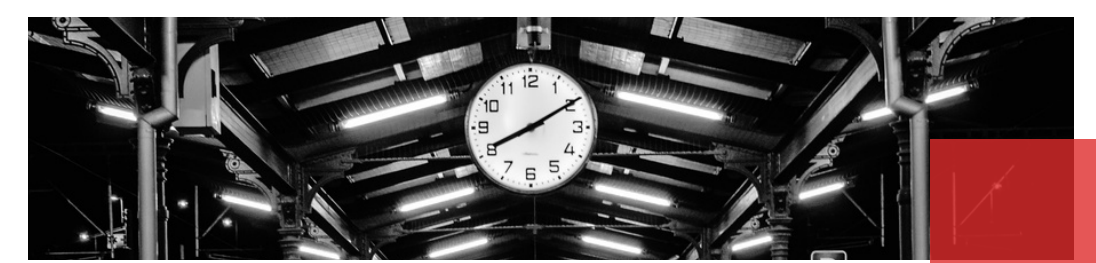

- Feel demotivated and undervalued in classical companies
- Are blocked in their creativity and ability to make decisions
- Want to work on their terms for a clear purpose with recognition

... are shaping a new economy

- They leave classical companies seeking new ways of working
- Increasing the demand for their skills.
- Discovering that purposeful and culture-driven organisations can indeed compete
- In the space between classical companies and gig economy

... enabled through "qipu"

- Simplifying the creation of communities aligned on a purpose
- Operating following Holacracy concepts ensuring fairness and collaboration
- In a community guaranteeing fair remuneration based on contributions
- Powered by DAO technology

The Utopia

Massively simplifying the creation and operation of knowledge communities

Creating a shared economy, where reputation and fair rewards drive meaningful contribution

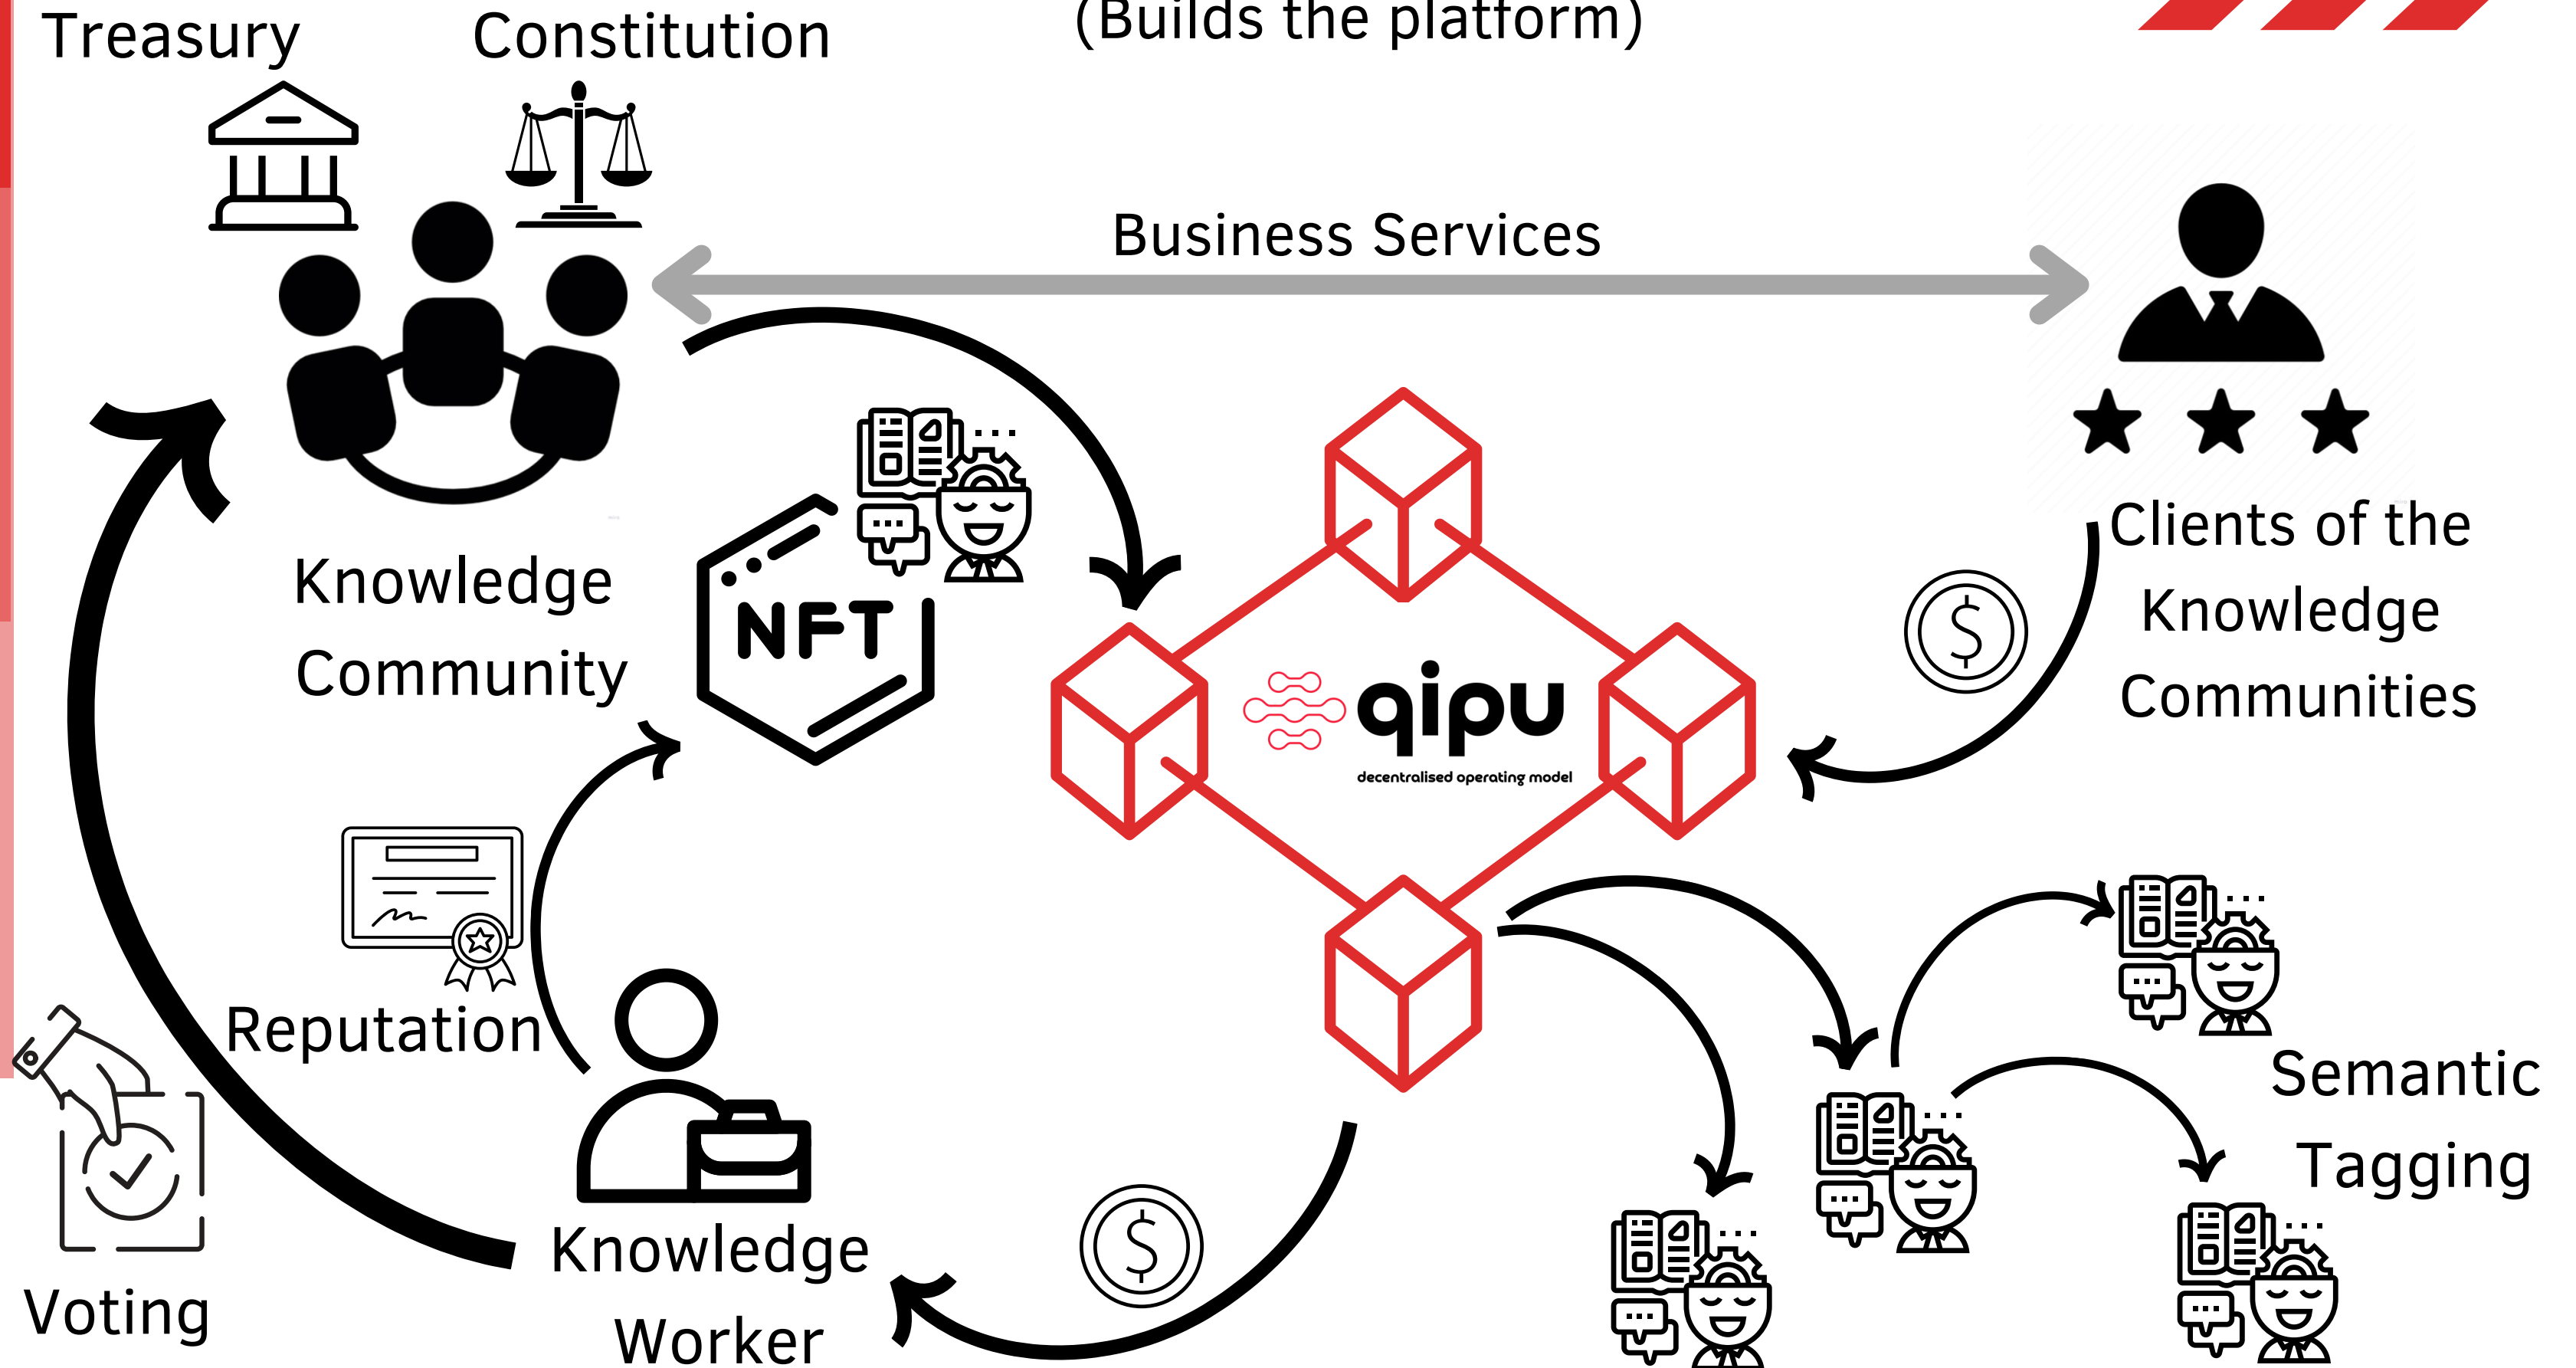

Providing income streams for the next generation of knowledge workers

Income is based on your intellectual sweat asset
